Volume 264 **CONTENTS** 10 April 1994

Wavenumber selection and irregularity of spatially developing nonlinear Dean and Görtler vortices. Y. Guo and W. H. Finlay *page* 1

Electrophoretic motion of an arbitrary prolate body of revolution toward an infinite conducting wall. Jian-Jun Feng and Wang-Yi Wu 41

A numerical and theoretical study of the first Hopf bifurcation in a cylinder wake. Jan Dušek, Patrice Le Gal and Philippe Fraunié 59

Scale-dependent merging of baroclinic vortices. J. Verron and S. Valcke 81

Wall imperfections as a triggering mechanism for Stokes-layer transition. P. Blondeaux and G. Vittori 107

Evolution equations for counterpropagating edge waves. R. D. Pierce and E. Knobloch 137

Nonlinear stability of multilayer quasi-geostrophic flow. Mu Mu, Zeng Qingcun, Theodore G. Shepherd and Liu Yongming 165

Streamwise vortices and transition to turbulence. James M. Hamilton and Frederick H. Abernathy 185

Direct numerical simulation of passive control of three-dimensional phenomena in boundary-layer transition using wall heating. L. D. Kral and H. F. Fasel 213

Transient and asymptotic stability of granular shear flow. P. J. Schmid and H. K. Kytömaa 255

Dynamics of an isolated barotropic eddy on a beta-plane. Gennady K. Korotaev and Alexander B. Fedotov 277

Solitary waves on a vorticity layer. F. J. Higuera and J. Jiménez 303

The viscous interaction between sound waves and the trailing edge of a supersonic splitter plate. N. Peake 321

Interaction of oblique instability waves with a nonlinear plane wave. David W. Wundrow, Lennart S. Hultgren and M. E. Goldstein 343

Corrigendum 373

Review

Fluid Transients in Systems, by E. B. Wylie and V. L. Streeter, Water Hammer in Pipe-Line Systems, by J. Zaruba 375
